

The M3 Universal Mixer can be used with any of our tanks.

- RTK-300-3 gal tank
- RTK-750-3 gal tank
- RTK-1200-3 gal tank

**Note:** When using the M3 Mixer with the 750 and 1200 gallon tanks there are a few things to be aware of.

1. You should use the tank jets that come with the mixer to ensure you have the proper back pressure on the pump to give you max performance.
2. When working with tanks greater than 750 gallons we recommend the round horizontal style of tank, which will allow the jets to turn the mud easier.
3. Max of 100 GPM to the Drill

- RTK-750-4 gal tank
- RTK-1200-4 gal tank

The M4 Universal Mixer can be used with either our 750 or 1200 gal tank.

**Note:** Both M4 & M3 Mixers come with 4 tank jets, hoses are not supplied.
